DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5, 8, 10, 14 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Lin et al...

Lin et al., U.S . Patent No. 6936923 discloses a fine pitch solder bump arrangement. As shown in Figure 17, semiconductor chip surface 30 has a metallization structure formed on its surface. A UMB layer 36 is formed over metallization 32. Conductive bump 50 is formed over the UMB layer 36. AS shown, the UMB layer has a larger linear dimension than the diameter of the conductive bump 50. Between layer 36 and bump 50 are copper layer 46 and titanium layer 48. Column 9 line 41 explains that UMB layer comprises barrier layer of titanium and a layer of copper..

Allowable Subject Matter

Claims 2 – 3, 6 – 7, 9, 11-13, 15-16 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
